

SOUND CEILING

Sound Ceiling is a decorative and absorbing acoustic product designed for wall and ceiling paneling that improves the acoustic quality in all types of spaces with no need to change structures or make works. Thanks to its core made of recycled polyester fiber, we obtain very high absorption coefficients making it an ideal product to amend the acoustic intelligibility problems caused by the typical acoustic phenomena in rooms, such as echo, focalization, high reverberation time or any other effect generating acoustic discomfort.

Available in:

Black laminated velor backside
Black unlaminated disc
White laminated velor backside
White unlaminated disc
All discs available in felt

Dimensions, width x height:

600 x 1200 mm
900 x 900 mm
600 x 600 mm
