

SOUND ACOWALL

Acowall is an effective wall absorber for the greatest possible sound attenuation. Acowall can be used as a single sound absorber or as an additional complement to absorbent floors and table screens. With its 20 mm thick absorbent, Acowall attenuates the reverberation sound by 50 db.

The wall panel is easy to mount. Fasten with mounting glue or hidden screw fastening. Acowall is built in a material of 100% recycled PET bottles and a veneered MDF. Note!

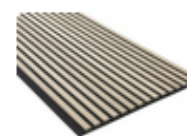

Delivered without mounting glue / screw.

Specified dimensions:
2400 x 605 mm
1200 x 600 mm.
600 x 600 mm.

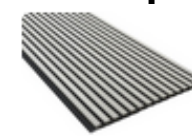

Can also be specially ordered for different projects.
